

National Consultations

The national consultations in at least 56 countries are intended to foster an inclusive multi-stakeholder process and advocate for a Post-2015 development agenda informed by national and local priorities.

We invite our members to contact their relevant focal point to be informed and the date and place where the consultation will take place and to be invited to participate. (see model letter attached)

If your country or the contact point does not appear below, please check regularly on this page: <http://www.worldwewant2015.org/sitemap>.
