

The 20th session of the annual UN Climate Change Conference (UNFCCC COP20/CMP10) will take place in Lima, Peru on 1-12 December 2014.

UN Lima Climate Change Conference is expected to prepare the necessary technical and legal framework for a global climate regime in the post-2020 period to be agreed in Paris, France in December 2015.

Local Government Climate Roadmap - Lima Dialogues will facilitate the engagement and visibility of local and subnational governments at UN Lima Climate Change Conference.

The UN Warsaw Climate Change Conference in December 2013 resulted with the second COP decision for local and subnational governments to enhance their recognition as governmental stakeholders of the global climate regime, thanks to the fruitful outcomes of the ADP Workshop on Urbanization and the first "Cities Day" by COP19 Presidency.

In June 2014 in Bonn, a one-day event was held with national delegations and experts on scaling-up actions at the local and subnational level.

At the Climate Summit 2014 in New York, Compact of Mayors was launched as the world's largest coalition on local climate action, designating the carbonn Climate Registry as its central repository, which already captures impressive climate information of some 500 local and subnational governments serving more than 12% of world's urban population.

In October 2014 in Bonn, UNFCCC ADP Co-Chairs released a revised draft text to be negotiated which contained significant elements to empower local and subnational governments, supporting their new ambitious commitments and actions.

Core activities of the Local Government Climate Roadmap - Lima Dialogues include a high level event at Lima City Hall on 8 December Monday, numerous side events and contributions to Lima Action Dialogue at the High level Segment with non-state actors.

Objectives:

- Facilitate updates on progress, exchange of information and share of good practices and experience in integration of local climate action to efforts at the subnational, national, regional, global level.
- Enhance engagement of delegations of Local Governments and Municipality Authorities (LGMA) Constituency throughout UN Lima Climate Change Conference.
- Provide active contributions in the official UNFCCC negotiations, with a specific focus on ADP Process, including the work of Technical Expert Meeting on Urban Environment.

Activities:

- Hosting, co-organizing or contributing to side events, workshops, panels inside or outside the UNFCCC Conference venue and mobilization of senior technical staff or political leaders of representatives local and subnational governments, including supporting the efforts of the incoming COP20/CMP10 Presidency with the availability of resources.
- Coordination of the drafting, delivery and dissemination of LGMA Daily Briefings and interventions at the relevant official sessions throughout UN Lima Climate Change Conference between 1-12 December 2014.
- Dialogues with the delegations of Friends of Cities at the UNFCCC and their allies, the UNFCCC Secretariat, and COP/CMP Presidencies.

Expected Outcomes:

- Enhanced understanding for vertically integrated climate action at the local, subnational, national, regional, global level.
- Advancing on the recognition, engagement and empowerment of local and subnational governments in the Post2015 Global Climate Regime as governmental stakeholders, with a particular goal of adoption of a 10-Year Action Plan as a part of Paris2015 Outcome.
