

LOCALIZING THE SDGs IN AFRICA

[SOU4]

#Africities8

The Global (2030 Agenda) and Continental (Africa 2063) Agendas have a territorial dimension and require a strong involvement of local and regional governments to achieve their objectives. Yet, are local and regional government aware of the Agendas? Do local and regional governments have the necessary means and enabling support to act and take co-ownership of the achievement of the Agendas at each level? This session will highlight the state of local government engagement in Africa in Localizing the SDGs, based on preliminary results of the regional chapter of the Global Report on Decentralization and Local Democracy (GOLD V), and initiatives to build the local capacity to support the localization of SDGs in Africa

#LocalizingSDGs #UCLGmeets
