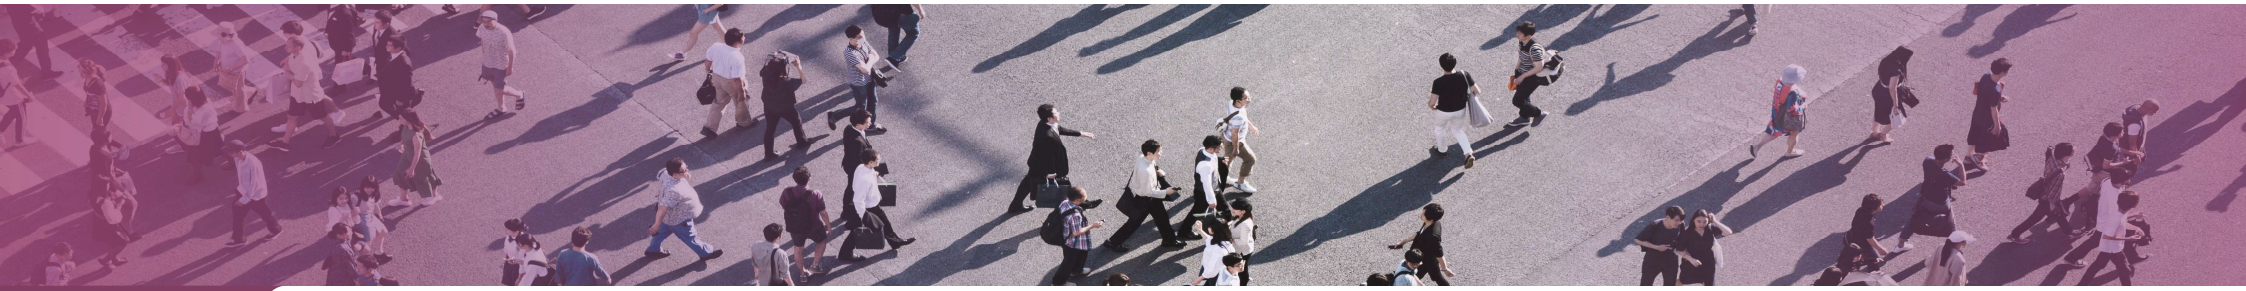
UN HABITAT FOR A BETTER URBAN FUTURE



NYC

Mayor's Office of the
Chief Technology Officer

The most essential technology is internet connectivity, and that is more clear now than ever.

The Mayors Office of the CTO is helping City agencies to deliver services and resources to New Yorkers, creating new services for New Yorkers, and releasing toolkits for the communities that are most in need.

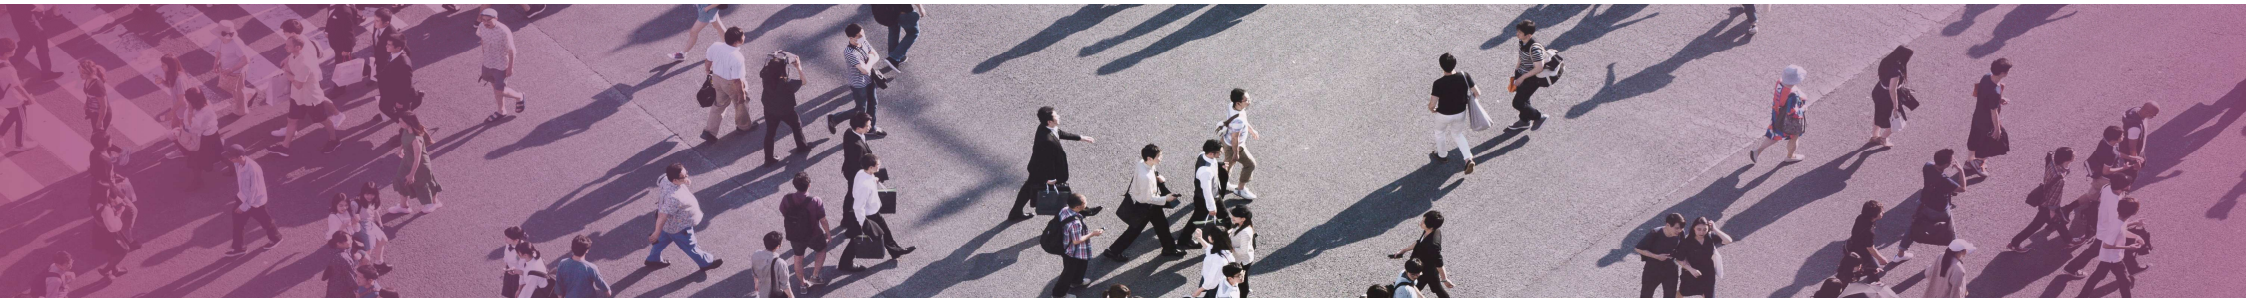
UN-HABITAT FOR A BETTER URBAN FUTURE

Digital Technologies in the COVID 19 emergency

Three challenges and/or solutions that characterize the use of digital technologies during the COVID 19 emergency

- ***Working from Home***
- ***Having a (Digital) Life***
- ***Fighting Disinformation***



Learning from the crises

During the COVID-29 pandemic, all of us depend on connectivity to do work, buy essential supplies and groceries, stay in touch with friends and family, and to continue education online.

*Broadband is **absolutely critical** to individuals and families, and to public health. For all of these reasons, NYC is unwavering in its commitment to bringing connectivity and digital resources to all New Yorkers.*
